Bioactive Components in Milk and Dairy Products
Edited by YOUNG W. PARK

Although bioactive compounds in milk and dairy products have been extensively studied during the last few decades – especially in human and bovine milks and some dairy products – very few publications on this topic are available, especially in other dairy species’ milk and their processed dairy products. Also, little is available in the areas of bioactive and nutraceutical compounds in bovine and human milks, while books on other mammalian species are non-existent.

Bioactive Components in Milk and Dairy Products extensively covers the bioactive components in milk and dairy products of many dairy species including cows, goats, buffalo, sheep, horse, camel, and other minor species. Park has assembled a group of internationally reputed scientists in the forefront of functional milk and dairy products, food science and technology as contributors to this unique book. Coverage for each of the various dairy species includes: bioactive proteins and peptides; bioactive lipid components; oligosaccharides; growth factors; and other minor bioactive compounds. Bioactive components are discussed for manufactured dairy products, such as caseins, caseinates and cheeses; yogurt products; koumiss and kefir; and whey products.

Aimed at food scientists, food technologists, dairy manufacturers, nutritionists, nutraceutical and functional foods specialists, allergy specialists, biotechnologists, medical and health professionals, and upper level students and faculty in dairy and food sciences and nutrition, Bioactive Components in Milk and Dairy Products is an important resource for those who are seeking nutritional, health and therapeutic values or product technology information on milk and dairy products from the dairy cow and species beyond.

Contents
Chapter 1: Overview of Bioactive Components in Milk and Dairy Products

Section I: Bioactive Components in Milk
Chapter 2: Bioactive Components in Bovine Milk
Chapter 3: Bioactive Components in Goat Milk
Chapter 4: Bioactive Components in Sheep Milk
Chapter 5: Bioactive Components in Buffalo Milk

Chapter 6: Bioactive Components in Camel Milk
Chapter 7: Bioactive Components in Mare Milk

Section II: Bioactive Components in Manufactured Dairy Products
Chapter 8: Bioactive Components in Caseins, Caseinates, and Cheeses
Chapter 9: Bioactive Components in Yogurt Products
Chapter 10: Bioactive Components in Kefir and Koumiss
Chapter 11: Bioactive Components in Whey Products

Chapter 12: Probiotics and Prebiotics as Bioactive Components in Dairy Products

Section III: Other Related Issues on Bioactive Compounds in Dairy Foods
Chapter 13: Regulatory Issues and Functional Health Claims for Bioactive Compounds
Chapter 14: New Technologies for Isolation and Analysis of Bioactive Compounds
Chapter 15: Potential for Improving Health: Immunomodulation by Dairy Ingredients
Chapter 16: Potential for Improving Health: Calcium Bioavailability in Milk and Dairy Products
Chapter 17: Potential for Improving Health: Iron Fortification of Dairy Products
